

BUILD BEETLES

Draw your own beetles at home by choosing different shapes for the body parts from the ideas below.

Antennae

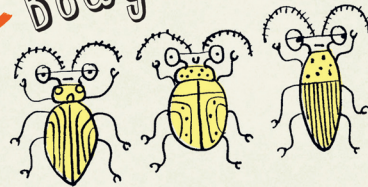

They could point to the front or to the back.

Head

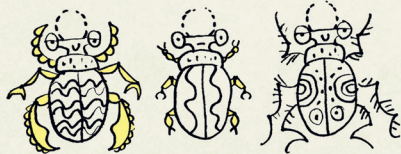

Body

Legs

Beetles always have six legs. They can be long, short, hooked, barbed...

Instead of drawing...

You could make your beetles by cutting out shapes from old magazines or newspaper and sticking them onto a piece of paper.

Now, go on a beetle hunt on this page...

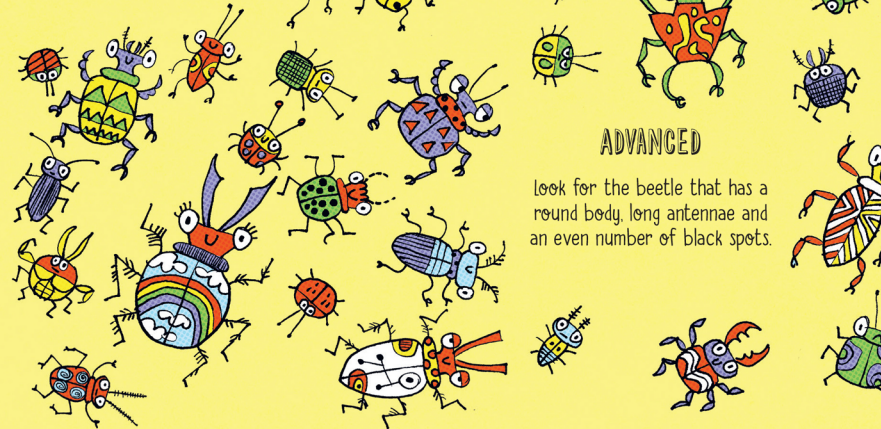

BEGINNERS

Identify the beetle with the most spots.

INTERMEDIATE

Find two identical beetles.

ADVANCED

Look for the beetle that has a round body, long antennae and an even number of black spots.

Hunt for beetles outdoors, too..

Around a quarter of all animals are beetles, so there should be lots to find outside. Look for them under stones and logs, on branches and leaves, and in long grass. How many different types do you spot?
