

Groups of parrots

The parrots are sitting in groups of 2. Complete the adding calculation to show how many parrots there are altogether.

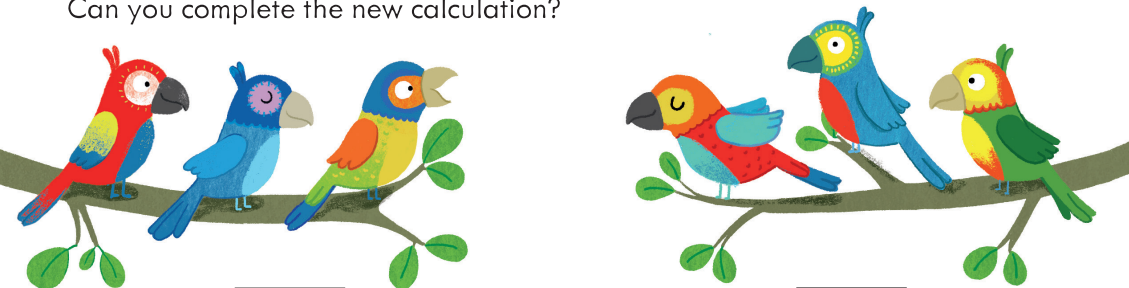

+ + = parrots
 Three 2s

When you are adding groups of the same number you can use the 'multiplying' sign. It's also called the 'times' sign. Beaky is pointing to it.

X

The parrots have moved into different groups. Can you complete the new calculation?

X parrots = parrots
 groups of

The parrots have moved into 1 big group. Complete this calculation.

X parrots = parrots

Now the parrots are flying around on their own. Complete this calculation.

X parrot = parrots
