

# SUPER SMART

SMART electronic devices can interact with a user or other devices. They range from smart watches which can send and receive messages, to smart speakers which understand what you say.

## DESIGN YOUR OWN

Think up a new invention, where you could add smart electronics to an everyday object to make it more useful.

### IDEAS

#### SCRIBBLE TO SCREEN PEN

Write anywhere and watch your drawings appear on a screen.

#### ANALYSIS SHOE

A smart sports shoe that sends information - including power, speed and direction - back to a computer.

#### NEVER-GET-LOST COAT

A coat with an in-built navigation system, which communicates with GPS satellites to help you find your way.
