

MAKE A FLIPBOOK MOVIE

Here's how to make your own animation. You'll need a piece of plain paper, some pencils, scissors and a clip.

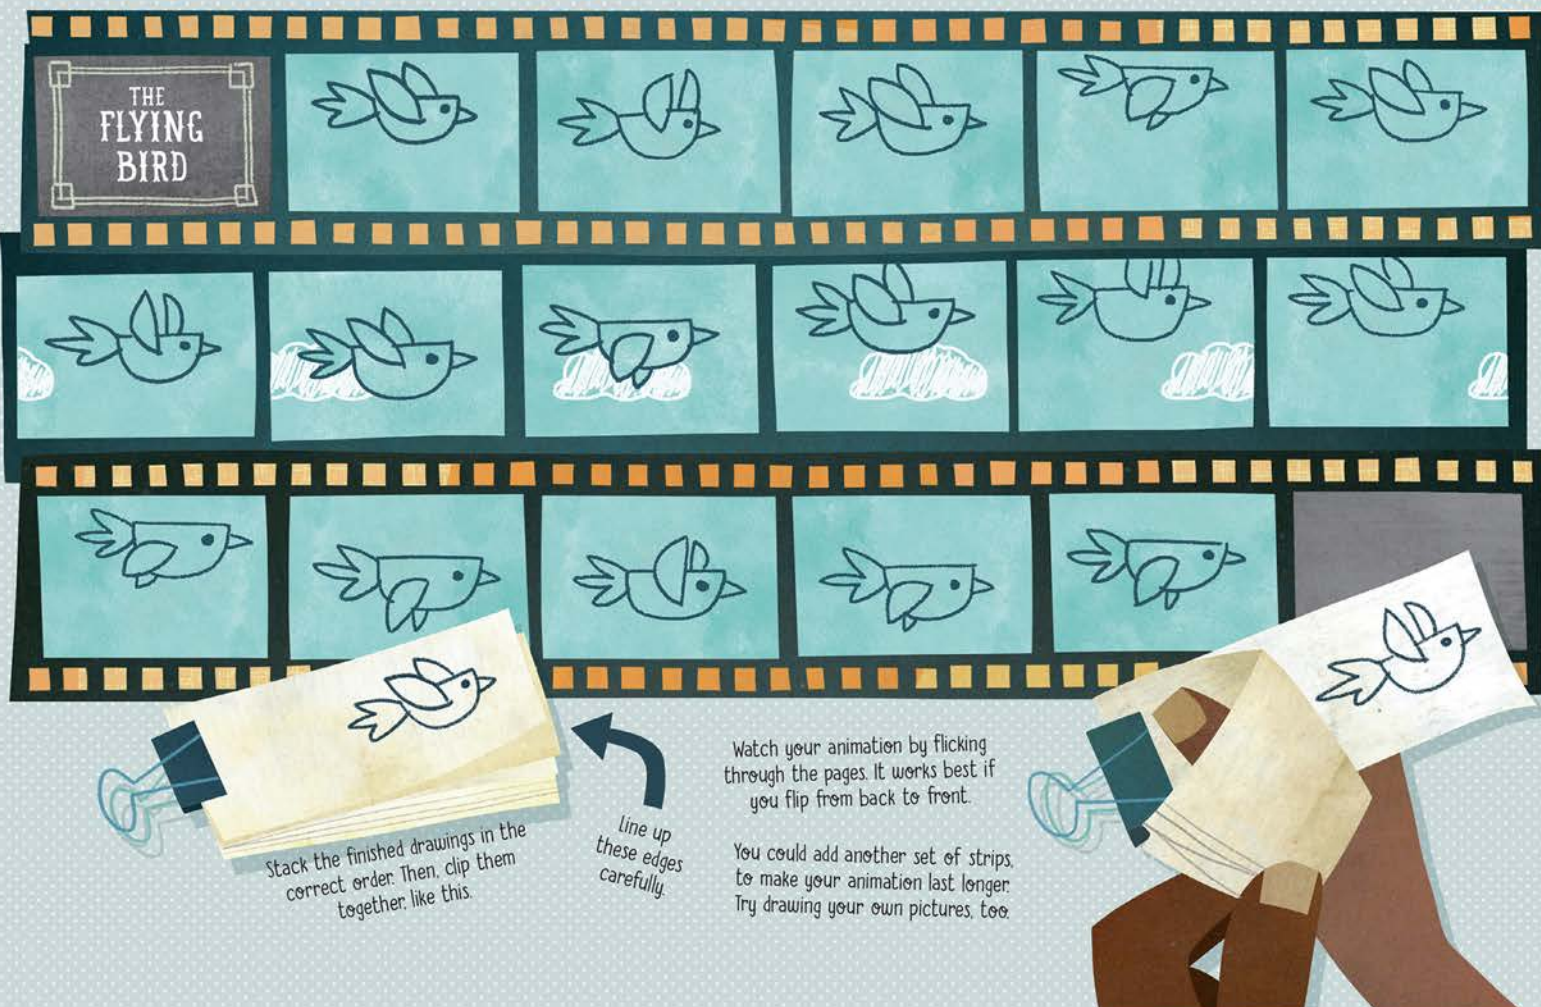

Fold a rectangular piece of paper in half this way once.

Then fold it in half this way...

...three times.

Cut along the fold lines to make 16 identical strips of paper.

Copy or trace the pictures in each square frame onto the right-hand half of the 16 strips (see below).
