

Paper finger-bugs

Have fun flying these bugs around on your finger, indoors or out.

1 Cut a strip of paper the width of a finger.

2 Put glue at the top of the strip.

3 Wrap it loosely around your fingertip...

Two for the wings

4 ...then press the glued end down to make a ring.

One for the body

5 Draw around the bottom of a cup three times on paper.

6 Cut out all three circles and fold the wings in half.

7 Draw details on the body...

8 ...then stick the wings on like this.

9 Push the ring onto the tip of your finger and glue your bug to it.

You could glue on paper strips for feelers.

Add details to the wings if you like.

Caterpillar

1 Make two rings that fit on your finger like this.

2 Cut a strip of paper a little longer than your finger...

3 ...and draw on details.

4 Glue one end of your caterpillar to each ring.

Your caterpillar should bend up in the middle.
