

# Whales

Whales 'talk' to each other using strange sounds that travel long distances through the sea.

Which two humpback whales are making the same sound? Draw around them.

The facts below are all missing a word. Find each missing word on the answer card and write it in.

## FACT FILE

- 1 Whales have a layer of fat called blubber under their..... It helps to keep them warm.
- 2 Even though many whales are huge, lots of them eat tiny shrimp-like ..... called krill.
- 3 Like dolphins, whales have to come to the surface of the sea to breathe.....
- 4 Blue whales are the.....animals in the sea. An adult blue whale weighs more than 20 elephants.

Answer card

creatures

biggest

skin

air

Grey whales sometimes swim huge distances to find food. Follow the arrows to take this mother whale and her calf to a place where there's food.

For each arrow, the whales move one square in that direction. They'll find food in the darker blue area of sea.

Join both sets of coloured dots to complete this blue whale. Start with 1 each time.
