

Zoo babies

When baby animals are born in a zoo, the keepers watch from a distance. They keep an eye on the babies and their mothers.

Can you match each baby below to its mother?

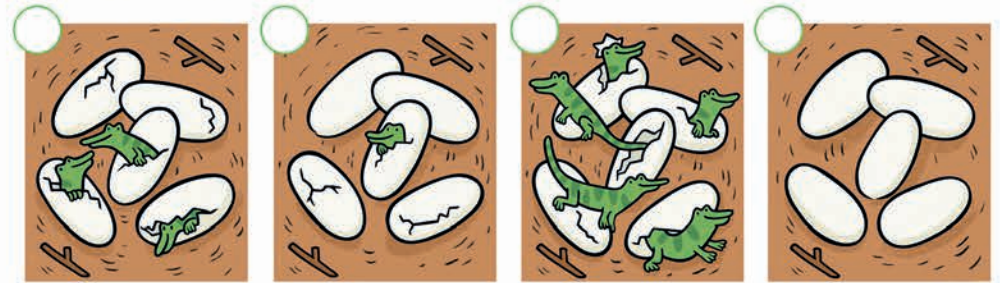

Write the correct number on the line below each baby.

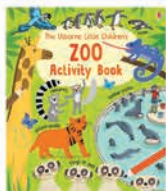

Write numbers to show how many babies each mother has.
Which mother has the most babies?

Put these pictures of baby crocodiles hatching from their eggs in order from 1 to 4.

A baby tapir has been exploring. Join the dots from 1 to 10 to take it back to its mother.
