

SATURDAY ACTIVITIES

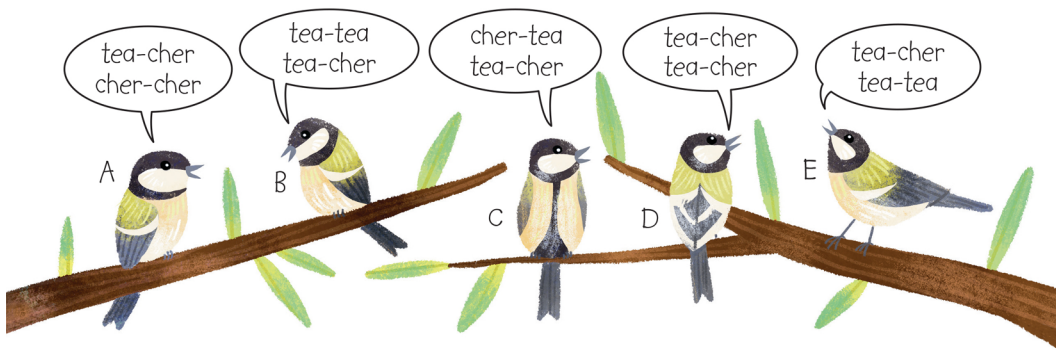

Bird behaviour

Different kinds of birds nest in different places. Look at the picture below. Which kind nests in trees, which nests at the coast, and which nests in the city?

-  Starling
-
-  Woodpigeon
-
-  Kittiwake
-

Each kind of bird has a different song. Great tits sing 'tea-cher tea-cher'. Which bird is singing this song?

Most birds feed on worms, insects, grubs or seeds. Turn these fingerprints into hungry birds.

Give the birds beaks, eyes, legs, wings and tails.

These birds are having a drink and washing their dusty feathers. Join the dots from 1 to 10 to complete them.
