

Penguins

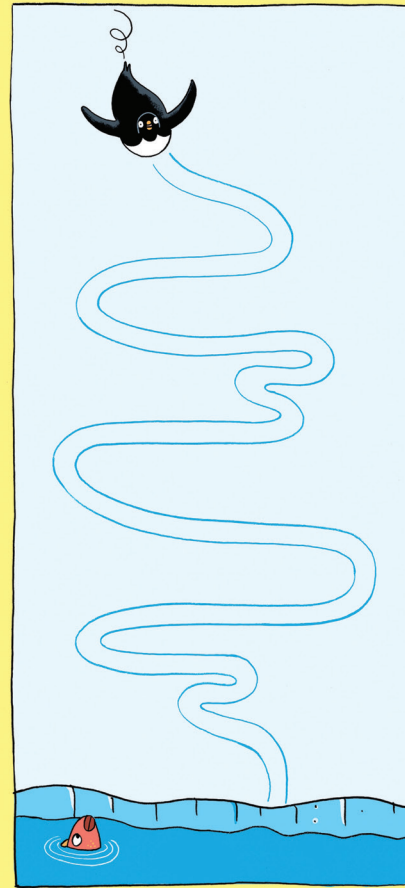

Penguins can't fly, but they're amazing at swimming underwater.

Look at the picture below. Can you spot...

- a penguin that's caught a fish?
- a penguin with an open beak?
- a penguin leaping onto the ice?
- a group of three fish?
- two swimming penguins that are exactly the same?
- a penguin looking at its feet?

Help this Adélie penguin slide to the sea on its tummy. Draw a line down the blue path to take it there and try not to touch the sides.

A mother emperor penguin is trying to find her chick. Which way does she need to waddle through the penguin colony to get to it?
