

# SATURDAY ACTIVITIES

## Visiting the Moon

Over 40 years ago, astronauts landed on the Moon.  
They explored in a moon buggy, collected rocks and took photos.

Which photo has this astronaut taken – A, B or C? .....

An astronaut is walking on the dry, dusty surface of the Moon. Did he leave all the footprints below?

18

The astronauts could see Earth from the Moon.

There are huge craters on the Moon.  
Draw more craters, like this:

1. Draw an oval.

2. Add lines for the sides.

3. Fill in half of the oval for a shadow.

4. Add rocks near the crater.
