

Decorated eggs

You don't need the yolk and egg white.

1. Crack an egg sharply on the rim of a mug. Then, carefully break the egg in half over the mug.

2. Wash the eggshells and leave them to dry completely. Brush white glue along the cracked edge of one half.

Match the cracked edges if you can.

3. Fit the other half on top. Brush glue around the crack to seal it. Put it in an egg carton to dry.

4. Rip some tissue paper into small pieces. Then, brush the top half of the egg with white glue.

5. Press the pieces of paper onto the wet glue. Add more glue and paper until the top is covered.

6. When the glue is dry, cover the bottom half with tissue paper in the same way. Leave it to dry.

7. Mix some paint with a little white glue. Paint one half of the egg. When it is dry, paint the rest.

Decorate one side first, then let it dry.

8. When the paint is dry, mix other paints with glue. Decorate your egg with flowers and spots.

Make up patterns of your own or use the ideas below.
