

# Spooky skull

**1** Sponge white over the upper part of the face like this, stopping just under the cheekbones and mouth.

**2** Sponge or paint a black circle over each eye and eyebrow, like this.

**3** Dip a pointed brush in black. Press the brush's side onto the nose to make two petal shapes – see page 11. Paint a line up from the petals.

**4** Dip a fine brush in black. Paint a straight line across the middle of the mouth. Paint fine lines across it. Then, paint a jagged line above one eye.

You'll need these colours.
