

**1** Sponge white in an oval onto the face, leaving large ovals around the eyes and eyebrows and leaving the lips. Wait until the paint dries.

**2** See page 11 for how to paint two-tone petal shapes. Load a pointed brush in mauve, with a purple tip. Make petal shapes around the eyes.

**3** Dip a pointed brush in red, then dip the point in purple. Press the brush's side three times on the forehead and three times on the chin, like this.

**4** Dip a pointed brush in black. Press the brush's side onto the nose to make two petal shapes. Then, paint a line up from the petals.

**5** Dip a fine brush in purple. Paint a curly line out from each side of the mouth. Then use black to paint fine lines across the curly lines.
