

Snowflakes

Use a hole puncher to make the hole.

1. Cut three strips of cardboard. Then, punch a hole in the end of one of the strips.

Sprinkle one side with glitter while the paint is wet.

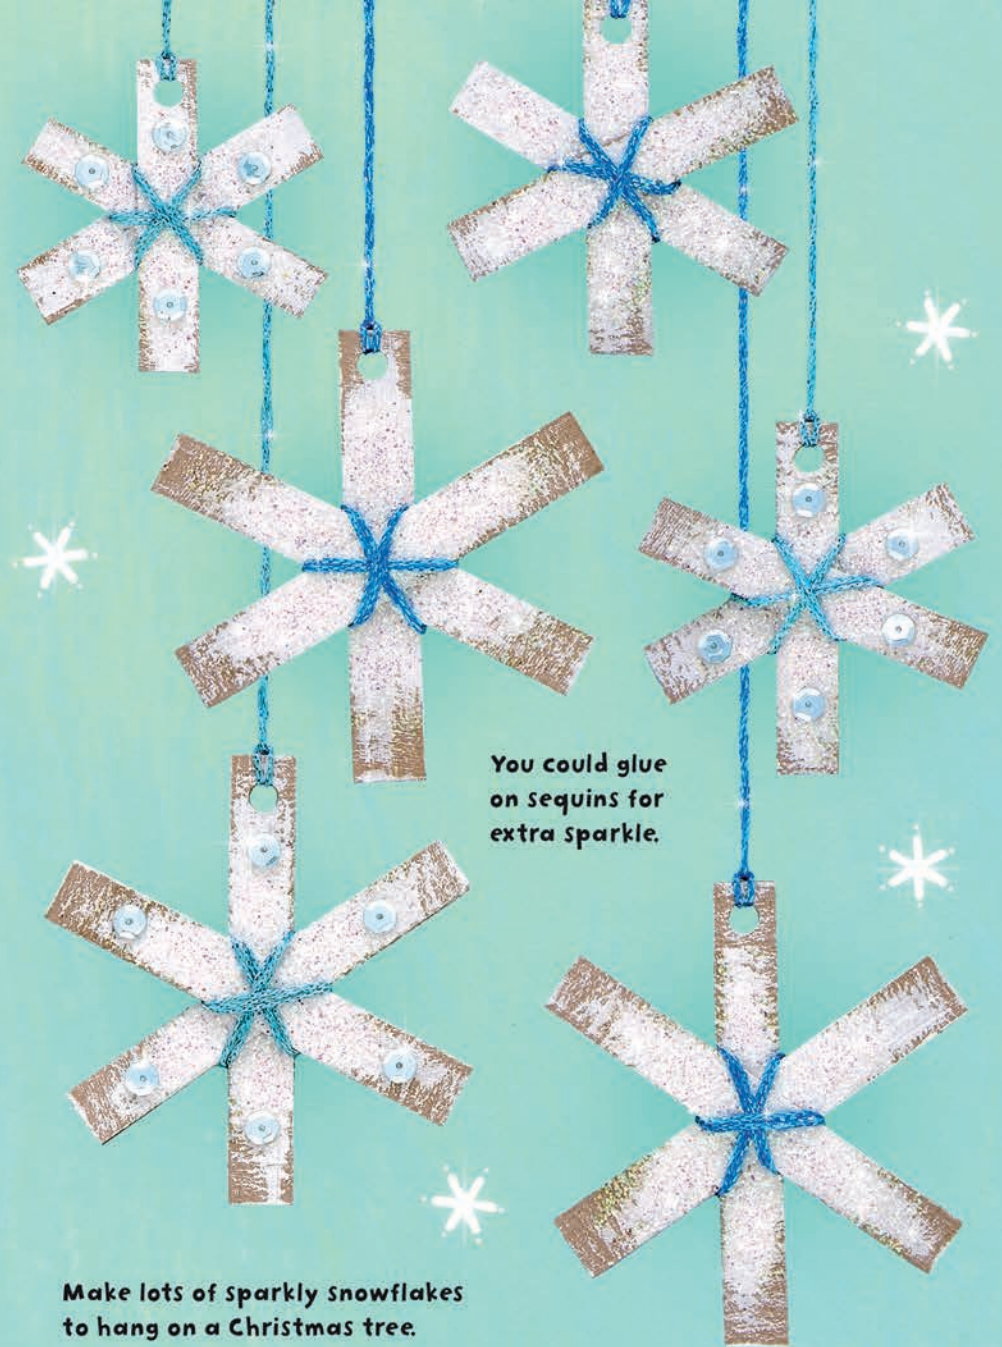

2. Mix thick white paint with glue, then paint the strips on both sides.

3. Lay the strips on top of one another, like this. Carefully glue them together, then let the glue dry.

4. Wrap thick thread around the snowflake. Secure it with a knot. Loop thread through the hole for hanging.

You could glue on sequins for extra sparkle.

Make lots of sparkly snowflakes to hang on a Christmas tree.
