

Paper penguin

You could draw a fish on blue paper.

- Draw the shape against the fold.
1. Fold a piece of thick black paper in half. Draw a shape for a body.
 2. Draw a line at the top for the penguin's beak, like this.
 3. Draw a wing halfway down. Add a flipper below, like this.
 4. Keeping the paper folded, carefully cut around the shape.
 5. Open out the paper and lay it flat. Use pencils to draw two eyes.
 6. Draw a line for the tummy, then fill it in. Fill in the flippers, too.
 7. Turn the shape over and use an orange pencil to fill in the beak.
 8. Fold the beak down and the flippers up. Fold the wings forward.
 9. Crease the middle fold again and stand up your penguin.
