

Printed parrot

1. Paint a shape for a parrot's body on a piece of thick paper using blue paint. Then, let it dry.

2. Paint feet, a beak and a pink spot on the cheek. Draw a dot for an eye.

3. Paint three red feathers for the parrot's tail. Add a curly feather on the head, too.

4. Spread dark blue paint on an old plate. Press your hand into it, then print a wing.

5. Press your hand into the paint again and print another wing.

You could paint a branch for your parrot to perch on.
