

CAN A COMPUTER BE CREATIVE?

Creativity is often thought of as one of the things that makes humans unique. But now AI can create things too.

AI programs can create art based on written instructions, from images to poetry.

Once it's been trained, an AI can even imitate the styles of famous painters.

Draw a unicorn riding a rocket.

Write a poem about a cactus, in the style of a haiku.

A desert's secret,
Cactus blooms in solitude,
Life finds its own way.

THE AI TIMES
AI TRANSFORMS NEWS REPORTING
Are robot journalists the new big thing?

This headline was written by AI.

AI MISTAKES

In the early days of AI art, there were some things the programs couldn't quite get right, such as hands and teeth.

Hmm, that's far too many fingers...

AI can change the way a photo looks.

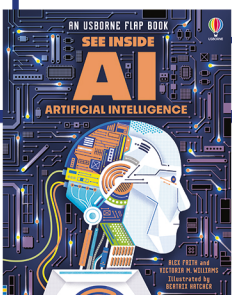

AI AVATAR BOOTH

I wonder what I'd look like as a superhero...

Which painting is this picture based on?

List reasons why person-led art might be 'better' than AI art.
