

# Tulip card

1. To make a card, fold a piece of thick yellow paper in half, with its long edges together. Then, press firmly along the fold.

2. Draw tulip shapes on bright paper and cut them out. Then, draw the same number of stalks on green paper and cut them out.

3. Glue the stalks at different heights onto the card. Make them overlap the bottom edge. Then, trim off the ends, like this.

4. Spread glue over the backs of the tulips. Then, press them onto the ends of the stalks, making some of them overlap each other.
