Route planning

Claudia has got to get to Daniela's home in Borgonuovo before half past nine, but she only has 17 euros and 50 cents. Luca wants to get there as early as possible, and Aurora has to go the cheapest way.

Decide which routes they take from Borgobasso to Borgonuovo. Then complete the sentences on each of their tickets to say what time they arrive in Borgonuovo and how much the journeys cost.
